Election/Restrictions

Claims 2-9, 13, 14 and 16-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group and species, there being no allowable generic or linking claim. Applicant timely traversed the election requirement in the reply filed on 08/23/07.

Applicant's election with traverse of Species X, referring to Fig. 18 and claims 1, 10-12 and 15 in the reply filed on 08/23/07 is acknowledged. The traversal is on the ground(s) that the Species of Figures 19-21 and 24 should be examined together inasmuch as these species are spinal stabilizers that all share substantial structures. This is not found persuasive because as disclosed in the brief description of the drawings Figs. 19-21 and 24 clearly disclose a plurality of different embodiments, see pages 14 and 15.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 10-12 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Marino US Patent 6,290,724 B1.

Marino discloses a cage (20) having a distal end (22) an open proximal end (24) having a key hole and anchors (36).

Regarding claims 11 and 12, see Figs. 1A & 1B, element 22.
